Brief – Resonal Tech

About the Company

- Founded in 2019, Resonal Tech is a leading Software Development Company specialized in Websites, Mobile Apps, ERP Systems, Branding, and AI Solutions.
- Operates across Saudi Arabia, Egypt, and the Gulf Region, focusing on smart digital transformation for SMEs and enterprises

Target Market & Audience

- **Primary Market:** Gulf region with focus on KSA (Riyadh, Jeddah) and Egypt (Cairo, Giza).
- **Target Clients:** SMEs seeking scalable, customized digital solutions.
- **Industries Served:** E-commerce, Construction, Healthcare, Real Estate, Legal, Education, Food Delivery, and Tracking Systems.

Business Objectives

- **Build brand awareness** and **increase sales** through integrated digital campaigns.
- Expand in the **KSA market** by attracting new **B2B leads and investors**.
- Strengthen positioning as **a trusted digital transformation partner** in the Gulf.

Key Performance Indicators (KPIs)

- **Qualified Leads & Retention Rate.**
- **Conversion Growth** through campaigns.
- **Brand Awareness Metrics** via engagement and reach.

Unique Selling Points (USP)

- **1 Year Guarantee** for all delivered projects
- **24\7\365 Technical Support** with fast SLA
- Free edits (if agreed in scope), and paid add-ons for new features.

Challenges & Opportunities

- **Weakness:** No physical office in KSA yet.
- **Opportunity:** Leverage digital campaigns to establish strong brand presence and acquire strategic partners.

Services

- Website projects start from **EGP 50K**.
- Mobile apps start from **EGP 250K**.
- Special offer: **25% discount** for the first 10 subscribers.

Campaign Focus & Platforms

- **KSA:** Instagram.
- **Egypt:** Facebook.
- Campaign goals: mix of **Awareness + Lead Generation**.
- Participation in **LEAP Tech Event** for visibility and networking.

Future Vision

1. Triple the number of quarterly projects.
2. Continue developing **AI-based SaaS products and custom ERP platforms.**
3. Strengthen partnerships and brand trust across the region.

BUSINESS MODEL CANVAS

Key Partners

- Business Developers
- Data Base
- Marketing Team

Key Resources

- Website and application development.
- Advanced development tools and techniques.
- A specialized digital marketing team

Key Activities

- Applications
- Websites
- Technical support
- User Experience Design
- Data analysis
- Performance reports
- Digital Marketing Campaign Management

Value Proposition

- Helping projects expand and grow.
- Establishing and distinguishing brand identity.
- Increasing sales and accelerating market penetration.
- Get an exceptional experience and after-sales service

Customer Relationship

- Direct and rapid communication via social media platforms.
- After-sales follow-up and technical support.
- Loyalty programs and discounts for regular customers.

Channels

- Instagram
- Facebook
- Public relations

Customer Segments

Small and medium-sized business owners

E-commerce stores and entrepreneurs

Companies looking to digitize their operations

Cost Structure

- Team salaries (programmers, designers, marketers).
- Server and domain hosting.
- Paid design and development tools

Revenue Streams

- Selling websites and applications.
- Monthly subscriptions for support and maintenance

SWOT Analysis

Strengths

- Competitive pricing (30% lower)
- faster delivery (20% quicker)
- one-year warranty with 24/7 support
- diverse services including Hypered Packages
- plus strong client satisfaction and case studies

Weaknesses

- No physical office in KSA
- low demand for ERP & AI services
- weak brand awareness (relying only on personal networks)
- and shorter market experience (since 2019)

Opportunities

- Huge digital growth in Saudi (Vision 2030)
- rising demand for e-commerce & apps
- potential from events like LEAP
- chance to upsell services (Marketing, Branding, AI)
- and ability to localize content for Saudi market

Threats

- Strong, established competitors (local & Indian firms)
- ERP market saturation
- economic/payment risks
- weak brand recognition
- and crowded Gulf tech market

Competitor Analysis Summary

(Based on Google SEO and the client's view of the top 3 main competitors)

Competitor Classification List (Based on Headquarters and Company Image Strength)

Direct Competitors

Athr Company

- Has 5 branches: two in Saudi Arabia, one in the UAE, and two in Egypt.

Awamer Alshabaka Company

- Has 2 branches: one in Egypt and one in Saudi Arabia.

Science Soft Company

- Has offices all over the world, including Saudi Arabia and the UAE.
- It was listed by **IAOP** among the **Top 100 Outsourcing Companies in the World for 2025**, for the fourth year in a row.

Moltaqa Company

- Has 2 branches in Saudi Arabia (Jeddah and Riyadh).

InDirect Competitors

Roqay Company

- Has 2 branches: one in Egypt and one in Kuwait.

Arab Apps Company

- Has 2 branches: one in Egypt and one in Kuwait.

1. Competitor Analysis (Direct Competitors) – Websites

Analysis Points:

- Services provided
- Google Ads activation
- Unique Selling Proposition (USP)
- Platforms they are active on

Athr Company

- **Services:** Mobile app design and development – Website design and development – Hosting – E-commerce – Game development – Ad campaigns – Motion graphics – Social media management – SEO.
- **Google Ads:** Not active
- **USP:** “Your integrated tech partner in the Saudi market, with local experience, high programming quality, and continuous technical support to help your project grow with confidence.”
- **Platforms:** TikTok, Instagram, Behance, Pinterest

Awamer Alshabaka Company.

- **Services:** Website design and performance improvement – Mobile app design – E-commerce – Branding – WhatsApp business services – Digital marketing – Motion graphics – ERP and Odoo systems – Call center services – Social apps, and more.
- **Google Ads:** Not active
- **USP:** They promote five main values: innovation, quality, commitment to deadlines, after-sales service, and continuous communication.
- **Platforms:** Facebook, LinkedIn, X (Twitter), Instagram, YouTube, Snapchat, Behance, TikTok.

Science Soft Company.

- **Services:** Software development – Web development – Mobile app development – Application services – Testing and QA – Cybersecurity – IT consulting – Digital transformation – Managed IT services – IT outsourcing – Infrastructure services – IT support.
- **Solution services include:** CRM, ERP, finance management, supply chain, asset management, HR software, e-learning systems, e-commerce, mobile apps, data analytics, and web portals.
- **Google Ads:** Active
- **USP:** Provides safe and reliable technology solutions with global ISO 9001 & 27001 certifications, through a large specialized team that understands Gulf regulations and systems.
- **Platforms:** LinkedIn, X (Twitter), Facebook, YouTube.

- **Services:** Mobile app design – Website design and hosting – E-commerce – Digital marketing – Motion graphics – Branding – Business development – SEO – Free consultations, and more.
- **Google Ads:** Active
- **USP:** “We provide customized technical and strategic solutions based on accurate market research to drive long-term business success.”
- **Platforms:** WhatsApp, Facebook, Snapchat, YouTube, Instagram.

2. Social Media Competitor Analysis Summary (Direct Competitors)

Strengths

- Competitors use different social media platforms actively.
- They mainly focus on their websites, Facebook, TikTok, Instagram, and sometimes Snapchat.
- Their designs are professional and consistent with their brand identity.
- They apply POC models and focus on branding for their services.
- Some use emotional or engaging content, such as celebrating employees or introducing their roles.

Weaknesses

- Most of them do not use paid social media ads.
- As a result, any offers or discounts they share get little attention because they are not supported by interactive or targeted content.
- Many have accounts on X (Twitter) but rarely post.
- Their writing style lacks consistency; they mix formal and informal language.
- Some companies, such as Roqay, have weak customer service, according to one client's experience.

Social Media Presence (Number of Platforms)

STP

Segmentation:

Focus on Small and Middel companies & startups
across industries (E-commerce, healthcare, education, real estate, food delivery)
mainly in Saudi Arabia (Jeddah & Riyadh)

Positioning:

- 20% faster delivery
- one-year warranty

Targeting:

Primary audience = Small and mid companies in KSA
.secondary = startups in Egypt
Future opportunity with large enterprises (ERP/AI) & Gulf countries

STP Marketing

Segmentation, Targeting, and Positioning

bbanote.org

Objectives

1. Increase Sales of Hypered Packages

- Sell 3 Mobile App + 3 Website packages in Saudi Arabia (per quarter)
- Competitive price (18,000 SAR) + 25% discount for first 10 clients
- Hypered Packages generate 35% of total revenue

2. Build Brand Awareness in Saudi Market

- Strengthen presence on TikTok + Instagram (KSA) and Facebook (Egypt)
- Achieve 1,000 new followers and 1,000 engagements in 3 months
- First paid campaigns = high growth potential

Objectives

3. Generate Qualified B2B Leads

- Get qualified SME leads in first quarter
- Tools: Landing pages + paid ads + LEAP event participation

4. Improve Client Retention Rate

- Launch support & maintenance programs + upsell services (AI, Branding).
- Target 70% client retention within 12 month
- Strong after-sales service = higher satisfaction & referrals

Target Audience

- **Age category**
From 30 to 60
Owners of companies
- **Geographic location**
Saudi Arabia (Jeddah - Riyadh)
- **Interested and attitude**
Clients want to move and lead their business to digital media
They focus on trusted companies to do this step

Eng saleh el hamadi

Age: 45

Location: Jeddah ,saudi arabia

Occupation: Owner of a mid-sized agricultural trading company

Education: Bachelor's in Agricultural Engineering

Business Type: Import & Export of seeds, fertilizers, crops and finalize permissions for other farms

Background

Mohamed has been in the agriculture business for over 15 years, focusing on importing high-quality seeds, exporting crops, and consulting other farmers and traders. His company is now expanding internationally and needs a professional multilingual website to communicate with partners in the Middle East, Africa, and Europe.

Goals

Build a credible online presence to attract global partners.

Have a multilingual website (Arabic, English, French) to reach different markets.

Showcase products, certifications, and services clearly

Generate qualified leads through online forms and inquiries.

Position his company as a trusted advisor in agricultural trade & consultancy.

Challenges

Language barriers when dealing with foreign partners.
Limited digital presence compared to international competitors.
Building trust with global buyers online.
Complex import/export compliance regulations.

Needs from the Website

Multilingual support (Arabic, English, French, others if needed).
Company profile & credibility elements (certificates, licenses, partnerships)
Clear product/service catalog with images and details.
Online consultation booking system for agricultural advisory.
Contact forms & WhatsApp integration for fast communication.
SEO optimization to appear in global searches.

Key Messaging

"Your trusted partner in agricultural trade & consultancy."
"Connecting farms to global markets with quality and trust."
"Multilingual agricultural solutions for international growth."

Name : Khalid Al-Harbi

Age : 50

Location: Riyadh, Saudi Arabia

Occupation: Independent Trade Intermediary

Business Role: Connects wholesalers with retailers

Education: Bachelor's degree in Business administration

Status: Married

Goals

- Earn commission by successfully connecting wholesalers and retailers.
- Build a trusted reputation as a reliable middleman.
- Expand his network of suppliers and retailers through digital tools.
- Save time by managing multiple deals from one platform

Challenges

- Relies heavily on manual calls, WhatsApp chats, and personal contacts.
- Difficult to keep track of changing wholesale prices and promotions.
- Risk of delayed payments or disputes without a clear system.
- Time-consuming to physically visit wholesalers or retailers.

Needs from the App

- A central mobile platform to connect wholesalers & retailers.
- Clear commission system that secures his role as intermediary.
- Real-time product prices & availability from wholesalers.
- Secure payment options (Mada, STC Pay, Bank Transfer).
- Arabic-first interface, easy-to-use and mobile-friendly.
- Ability to track orders & deliveries directly inside the app.

Key Messaging That Converts

- Be the smart intermediary — all deals managed in one app.
- Connect wholesalers and retailers instantly — and grow your commission.
- Save time, build trust, and increase your profits with a secure marketplace.

Strategy

Tone Of Voice

1. Professional & Confident

clear, concise, and authoritative language.

2. Solution-Oriented & Strategic

- Focus on business outcomes — efficiency, scalability, ROI, and performance.
- Speak to the client's pain points and explain how your services solve them.

Brand Positioning

"Resonal tech is home software company that transforms ideas into Custom digital solutions for Mid-sized to large companies and Digital-first startups that drive business growth. Website

1. Research & Discovery Phase

- Conducted a full business brief analysis covering company history, audience, competitors, and objectives.
- Identified target markets (KSA & Egypt) and key industries (Healthcare, Real Estate, E-commerce, Construction, Education).
- Defined the company's core services: Web & App Development, ERP Systems, Branding, and AI Solutions.
- Highlighted Unique Selling Points (USPs):
 - 20% faster delivery time.
 - 1-year full guarantee.
 - 2–6 hours maximum response time.

2. SEO & Keyword Strategy

- Built a bilingual keyword system (Arabic & English) based on high-volume search data using Google Keyword Planner.
- Categorized keywords per service and target market (KSA & Egypt).
- Prepared a strategy for website on-page SEO optimization and blog content pillars for long-term ranking.

Website

3. Competitor & Market Analysis

- Conducted a detailed study of both direct and indirect competitors in KSA and Egypt (e.g., Awamer Al Shabaka, Roqay, ScienceSoft).
- Analyzed their website structure, service presentation, CTA flow, and design language.
- Extracted best-performing UX/UI patterns to apply in Resonal Tech's site wireframes.

4. Website Architecture & Navigation

- Designed a complete Site Map including all main and sub-sections:
 - Home
 - About Us (with Mission, Team, Partners, Careers)
 - Services (Web, Mobile, Branding, ERP, AI)
 - Portfolio & Case Studies
 - Industries
 - Process
 - Why Choose Us
 - Testimonials
 - Blog
 - Contact Us (with "Request a Quote" form)
 - Legal (Privacy, Cookies, Terms)
 - FAQ
- Defined each section's purpose, subpages, and user journey.
- Added an interactive sidebar navigation for subpages under each section.

Website

5. Website Copywriting

- Wrote all bilingual content (Arabic & English) in a professional, SEO-friendly tone.
- Used a simple, modern, and trust-building voice that fits Gulf and Egyptian audiences.
- Ensured keyword integration and CTA alignment across all pages.

6. Design System & Visual Identity

- Developed Light and Dark themes for the full website.
- Created a consistent UI color palette:
 - Primary: #2D6BFF
 - Accent Cyan: #00C2FF
 - Accent Yellow: #FFC247
 - Dark BG: #0B1220 / Light BG: #F1F5F9
- Defined typography system (Inter / Cairo fonts) with hierarchical sizes.
- Created icon system (Rounded Outline, duotone style – Blue/Cyan/Yellow).
- Designed CTA buttons, frames, sidebar, chatbot, footer, and social area mockups.

Why Choose Us

PROCESS

Website

7. Wireframes & Visual Mockups

- Designed detailed wireframes for Home, Services, About, and Process pages.
- Created split-theme visuals (Light vs. Dark) for presentation clarity.
- Added high-quality mockups for:
 - Client Marquee (scrolling partner logos).
 - 7-step Process Flow (Submit → Discussion → NDA → Brainstorm → Quote → Contract → Kick-off).
 - AI Chatbot Interface (Dark & Light themes).

8. Content Calendar & Social Media Integration

- Developed two complete content calendars for Egypt & KSA markets.
- Designed funnel-based posting strategy: Awareness → Consideration → Conversion → Retention.
- Included 16 monthly Instagram posts + TikTok short videos + Paid Ads (Dark Posts).
- Matched website messaging with social tone and visual identity.

9. Technical & Performance Recommendations

- Delivered a professional document of technical instructions for developers:
 - Optimize Google Core Web Vitals (LCP, CLS, FID).
 - Use Lazy Loading, CDN caching, Mobile-First Design.
 - Ensure full responsiveness and 99% uptime.
 - Implement SEO-friendly URL structure (e.g., /services/web-development).

Website

10. Final Deliverables & Presentation Assets

- Produced 84-page structured marketing & website plan in bilingual format (AR/EN).
- Included all:
 - SEO keywords list.
 - Page-by-page website content.
 - Visual mockups and section covers.
 - Full presentation-ready PDF with front/back cover and index hyperlinks.
- Created A4 visual covers for each website section with unified branding style.
- Designed Index page buttons (UI dashboard style) for easy navigation inside PDF.

Website

11. Overall Outcome

- Delivered a complete premium digital transformation framework ready for implementation.
- Combined marketing, design, content, and UX strategy into one cohesive blueprint.
 - The website is now fully ready for development — with a clear user journey, optimized structure, and premium brand image.

Service-Specific Interests – Branding & Design	• Graphic design • Logo design • Brand identity • Marketing and advertising
Service-Specific Interests – AI & Tech	• Artificial intelligence • Machine learning • ChatGPT • Automation tools • Cloud AI

Visual Identity

logo: It is Simple, balanced, and attractive to reflect the essence of the brand and help the audience recognize it

Background : 1. General Aesthetic and Atmosphere A subtle, abstract, and futuristic technological background with a high-contrast, energetic gradient. The overall aesthetic is clean minimalist, and modern, .perfectly suited for a tech brand's visual identity, conveying innovation and digital connectivity

Primary Color Gradient (The Background Fill) The background features a smooth gradient transitioning .2 between three highly saturated, energetic colors, directly matching the style of the RESONAL

logo: Starting Color (Left Side): Luminous Electric Yellow Color
Name: Electric Yellow Approximate Hex Code: #FFFF00 to
#FFFC00 (A brilliant, saturated yellow). Description: This bright,
near-neon yellow dominates the left side, symbolizing energy and
innovation. Transition Color (Center-Mid): Bright Aqua-Green/Teal
Color Name: Spring Green / Bright Aqua Approximate Hex Code:
#00FF7F to #55FFE1 (A highly saturated, cool green-cyan blend).
Description: This color forms a dynamic, fluid link in the center,
enhancing the futuristic and digital flow. Ending Color (Right Side):
Dynamic Electric Blue Color Name: Electric Blue / Deep Electric
Blue Approximate Hex Code: #7DF9FF to #2C75FF (A vivid, highly
saturated electric blue). Description: This color provides depth and
a technological anchor, dominating the right section.

3. Overlays and Effects The visual depth and technological theme are created by these fine details: Central Illumination: A soft, fairly warm white light blooms in the exact center. It exhibits a very soft radial gradient effect but is not overly bright, providing a subtle focal point. Hex Code: #FFFFFF (Diffused). Circuit Pattern: Faint, thin, white-glowing circuit board patterns are overlaid onto the gradient. The patterns are subtly radiating outwards from the center, suggesting connectivity. Hex Code: #FFFFFF (Low Opacity). Particles: Tiny, delicate, shimmering bokeh particles are sparsely scattered across the entire image. This adds a final ethereal and high-tech touch to the scene (And consistent with the logo colors)

Color Palette: RESONAL Background Color Palette This palette is built on a vibrant, high-contrast tri-color gradient overlaid with delicate white technical elements, ensuring a modern, energetic, and digital aesthetic. I. The Gradient Colors (Base Palette) The main body of the background transitions smoothly between these three highly saturated, electric hues: Color Name Hex Code (Approximate) Function and Mood

Electric Yellow #FFFF00 Energy & Innovation. The starting point of the gradient on the left. Used to inject power and a sense of newness. Vivid Aqua Green #88FFC2 Flow & Transition. The dynamic midpoint. Acts as a smooth, futuristic bridge between the strong Yellow and Blue. Deep Electric Blue #32B0ED Stability & Technology. The end point of the gradient on the right. Grounds the design, adding trust and depth

Vivid Aqua Green #88FFC2 Flow & Transition. The dynamic midpoint. Acts as a smooth, futuristic bridge between the strong Yellow and Blue

Deep Electric Blue #32B0ED Stability & Technology. The end point of the gradient on the right. Grounds the design, adding trust and depth

Export to Sheets II. Detail & Effect Colors (Overlays) These colors are used for the textures and lighting effects that define the technological theme:

Color Name	Hex Code (Approximate)
Function and Mood Pure White	Light Bloom #FFFFFFF (Diffused)
Focal Point & Clarity.	Used for the bright, soft glow in the center, drawing the eye and symbolizing a core idea/solution.
Faint Glowing Circuitry	#FFFFFFF (Low Opacity)
Connectivity & Structure.	Used for the subtle, thin lines of the circuit board pattern, reinforcing the high-tech visual identity without being distracting.
Shimmering Bokeh/Particles	#FFFFFFF (Sparse Dots)
Ethereal/Digital Touch.	Used for the tiny, scattered white dots, adding depth and a feeling of subtle digital data flow.

Export to Sheets Typography : Font type : Tajawal such as Or DG Bebo such as Font color : white or Baby Blue Font size 70 : 80) OR (90: 100) Image text placement: Top of the image or right of it Visual patterns: They depend on the shape of circles or electronic lines that express the identity of the work. We do not depend on any other geometric shapes. The quality of the pictures: Portions of website or mobile app images, or business photos

 All videos on TikTok are vertical (9:16) only

Recommendations

,In the next phase, we recommend focusing on developing a comprehensive marketing plan for the project aimed at enhancing the company's digital presence and increasing awareness of the services offered through

Email marketing campaign

Google Ads

The focus is on targeting the Saudi market more through the use of social media platforms such as Snapchat, TikTok, and LinkedIn

Use white dialect

Using the Stories method and asking interactive questions

A detailed marketing plan for the business should be developed, targeting specific sectors such as medicine, education, and e-commerce

Focusing on more diverse services such as artificial intelligence services and managing digital marketing campaigns
